(54) ARTICLE HOLDER, AND PART THEREFOR

(57)Abstract:

PURPOSE: To make repeated use of an article holder possible while making it renewable partially with purchase of parts for the renewal by a method wherein the stripping paper is constructed in a combination of multiple areas so that the adhesive layer of the holder mount can be exposed in areas optionally selected.

CONSTITUTION: An article holder 10 is constructed of a holder mount 14 with an adhesive layer 12 and stripping paper 16 that is stuck to the holder mount. The stripping paper is constructed in a combination of multiple areas, in which the stripping paper is divided into stripping paper parts 16A, 16B and the like in optional shapes and sizes so that the adhesive layer part 12a on the holder mount can be exposed in optional areas in accordance with the sizes, the dimensions and the weights of articles to be held by the holder. For instance, tubes 50 in short length can be stuck to the adhesive layer part 12a with one strip of the stripping paper part 16A peeled off, while tubes 50 in long length can be stuck to the adhesive layer part 12a with two strips of the stripping paper parts 16B peeled off. Since the adhesive layer part 12a of the holder mount 14 can be used repeatedly, the holder mount 14 can be made reusable with new stripping paper 16 purchased after discard of the peeled-off stripping paper parts.
